

MOHCCN RETURN OF RESULTS SUBGROUP (ROR) Terms of Reference

Background

The vision of MOHCCN is to bring together leading Cancer Centres across Canada to collaborate on precision medicine to benefit cancer patients and drive innovation. The goal of the Network is to apply advanced technologies such as genomics and other omics, high-powered imaging, and artificial intelligence (AI) to advance precision oncology and improve cancer diagnosis and management.

When the funding for the MOHCCN was announced by the Federal Government in March 2019 it was determined that the MOHCCN should operate according to agreed standards and guidelines recommended by nominated Expert Working Groups (WGs). Seven WGs were established: Scientific Questions, Patients, Data, Technology, Data Platform, Health Technology Assessment, and Agreements. Additional WGs were since created.

The Return of Results has emerged as a subgroup of the Patients Working Group,

1. Mandate of WG

The WG is focusing on immediate priorities for MOHCCN Gold Cohort approvals and data preparation for submission to digital platforms, in close collaboration with designated sites and MOHCCN/TFRI leadership.

The mandate of the WG is to:

- **WG Responsibility:** To provide recommendations on a structure to return cancer-related germline results and to develop a platform to provide an option for MOHCCN cohorts to return results. In the future, to provide recommendations to return somatic results.
- **WG Strategy:** Socialization of draft policies among the WG members to identify areas of question/concern, followed by discussion of the feedback for integration and finalization of the policies.

2. Reporting Structure

Document Initiation and Development: For the development of the draft policy, any documents including any initial draft developed will be socialized, usually through a one-month comment period, with the WG. The drafts will live in a shared folder in TFRI's OneDrive that will allow for real-time tracking of edits and comments from all WG members. Feedback will be integrated and harmonized by MOHCCN Staff in collaboration with WG leadership. It is expected that WG members will consult with the individual designated Consortia/programs and initiatives and cohorts for input.

Draft Finalization: MOHCCN Staff will submit, usually via email, the draft policy to the Steering Committee along with a briefing note (BN). The BN will indicate the history of the development of that policy, including details on feedback received and any remaining areas of concern that were raised by WG members.

The Steering Committee will review, usually electronically, the policy and associated documents and provide their comments. When done electronically, a review template will be provided. Any contentious issues raised by Steering Committee will be addressed by the WG or MOHCCN Staff.

Document Endorsement: Finalized draft policy will be submitted for endorsement to Network Council along with a summary of the reviews provided by the Steering Committee and the relevant responses provided by the WG or MOHCCN Staff. Remaining issues will be outlined.

3. Composition

The membership of the WG will reflect the interests, philosophy, and strategic direction of the Network. It is composed of experts from each consortium member. This includes an effort to align with the 50-30 Challenge¹ to support gender parity and significant representation of under-represented groups.

The WG membership

Membership will be provided through the following process:

a. Chair/Co-chair appointment: Existing chairs from already active working groups would be asked to continue chairing the WG or for their suggestions on a replacement to MOHCCN/TFRI Staff. The formation of new WGs will be discussed at Network Council to seek their recommendations.

¹ The 50 - 30 Challenge is an initiative co-created by the Government of Canada, civil society and the private sector that aims to attain gender parity and significant representation (at least 30%) of under-represented groups on boards and senior management positions in order to build a more diverse, inclusive, and vibrant economic future for Canadians.

b. Membership: Each working group/committee will include representation from designated Consortiums/programs and initiatives. Members are proposed to a WG by designated Consortiums/programs and initiatives or MOHCCN/TFRI Staff, considered by the Chair/co-Chair and if approved, endorsed by the Network Council. Voting Members are MOHCCN Project Leaders and Researchers. Non-voting members may include Centres staff and outside advisers, based on the specific expertise required for the activities of a Working Group.

c. Membership Changes: Any additions or changes in membership will be reflected on the table below and communicated to Network Council for endorsement.

Chairs	Institutions	From	Until
Janessa Laskin	BC Cancer	May-2022	
George Zogopoulos	MUHC	May-2022	
PM2C			
Raymond Kim	UHN - Princess Margaret Cancer Centre	May-2022	
Lauren Hughes	OICR	Sep-2023	
BC2C			
Intan Schrader	BC Cancer	May-2022	
Holly Longstaff	PHSA	May-2022	
QC2C			
William Foulkes	McGill	2019	
Ma'n Zawati	McGill and PROFYLE	July-2022	Feb-2024
PR2C			
Shantanu Banerji	U of Manitoba	Feb-2023	
PROFYLE			
Caron Strahlendorf	BC Children's	NOT ACTIVE	Jan-2024
Anita Villani	SickKids	NOT ACTIVE	Jan-2024
Stephanie Grover	SickKids	May-2022	
Julie Shiu	SickKids	Jul-2024	
ACC			
John Thoms	Eastern Health	July-2022	
OCC			
Yvonne Bombard	Unity Health Toronto	Jun-2023	
Patient Partners			
Nicole Beauchemin	McGill	May-2022	
Jenny		Apr-2024	
Kirsten		Apr-2024	

Last Updated: August 2024

4. Management and Administration.

Quorum - A quorum of voting members (50% plus one) is required as a voting mechanism for WG decisions when needed. The vote may be requested by e-mail when not all members are present at a meeting, usually with a two (2) week deadline to hear back. Different perspectives are expected, and consensus is not necessary at the early stage. Any contentious issues can be

escalated for further feedback to the Steering Committee. The WG cycle might be iterative and if it comes to an impasse, then the Steering Committee or the Network Council could be asked to help resolve the problem.

Time commitment - The WG will usually meet at least four (4) times per year. Meetings may occur by teleconference, the duration of which shall be approximately 1-hour. One (1) meeting shall be held in-person each year if possible. Changes in the frequency of the meetings are expected as the mandate of the committee is fulfilled.

Term of membership - WG Chairs shall rotate on a two (2) or three (3) years provision. WG members shall serve for a minimum term of two (2) years. Centres can suggest a successor if at any point a member can no longer commit to their membership.

Meeting Facilitation - TFRI through MOHCCN Staff will facilitate the various WG meetings to ensure good integration of all activities. Responsibilities include pre-meetings with the Chairs, preparation of agendas and meeting minutes, socialization of materials for feedback and reporting to TFRI leadership.

5. Confidentiality and Conflict of Interest

All information provided to WG members in paper or electronic format during discussions shall be considered CONFIDENTIAL and must be treated in that manner. Conflicts of interest must be disclosed to the WG Chairs and addressed.

6. Remuneration

For some Working Groups, a remuneration model may be developed according to the WG's nature. That remuneration model will be approved by Network Council and included as an appendix to the WG Terms of Reference. Other reasonable expenses necessarily incurred by the member to attend meetings will be covered.

7. Terms will be Updated and Reviewed

WG terms will be modified and reviewed as needed, to reflect the evolution of the project. They will be reviewed annually and approved by the Network Council.
